THE CONFERENCE

Construction Law in Turbulent Times

2026 has been a turbulent year for Hong Kong and the construction industry. We have started to see the true potential from new opportunities in the Northern Metropolis and renewed activity in the private sector after gradually rising house prices. At the same time, we are suffering from high commodity and oil prices following the war in Iran, regulatory changes, and geopolitical headwinds. We have seen the first legislative changes following the devastating and tragic fire at a residential refurbishment in Tai Po in November 2025 where 168 people were killed and many others injured. Elsewhere, the industry has been reacting to the 2025 Construction Industry Security of Payment Ordinance alongside rapid adoption of innovative technology on our sites and in our office space. In this year's One Day Conference we will explore the ways the industry is managing risks, planning procurement, and managing projects in these turbulent times.
